## 400 VAC autotransformer with terminal block

The ATR-4 series of autotransformers are compact transformers designed for switchboard mounting or applications requiring output voltages lower than the input voltage. They reduce the primary voltage in steps.

### Key features

- Wide power range: 1,5–18 A
- Seven output voltages available at the secondary side
- Resin encapsulated
- Primary / input voltage: 3x 400 VAC / 50–60 Hz
- Construction class: II
- Insulation class: NEMA 155 / F
- Screw terminal block for easy connection
- Simple switchboard mounting thanks to robust mounting brackets
- Good corrosion protection and low noise

### Technical specifications

Input voltage	400 VAC ± 10 %	
Frequency	50–60 Hz	
Dielectric sensitivity	2.500 VAC	
Insulation class	NEMA F (155 °C)	
Protection standard	IP20 (according to EN 60529)	
Ambient conditions	Temperature	max. 35 °C
	Rel. humidity	< 90 % rH (non-condensing)

### Area of use

- Switchboard mounting or applications where the output voltages need to be lower than the input voltage
- Autotransformers are used in transformer fan speed controllers to control the speed of voltage controllable motors (pumps and fans) in HVAC systems
- For indoor use only

### Article codes

Article code	Rated max. current [A]
ATR-4-15L50	1,5 A
ATR-4-25L50	2,5 A
ATR-4-40L50	4 A
ATR-4-60L50	6 A
ATR-4-80L50	8 A
