

Solution details

The AC fan will be controlled via the two-speed transformer fan speed controller ST2R4. The external contact for activate the fan (Available NO and NC contact). Built-in clock for on/off and high/low speed switching. TK monitoring for thermal motor protection.

Suited for motor type: 400 VAC voltage controllable motors
Motor control: Transformer fan speed controller
Minimum motor speed: Make sure that the minimum voltage remains high enough to avoid stalling of the motor.
Maximum motor current: 10 A

 Consult the fan manufacturer for the correct wiring
